Chapter 2: Wordpress site setup

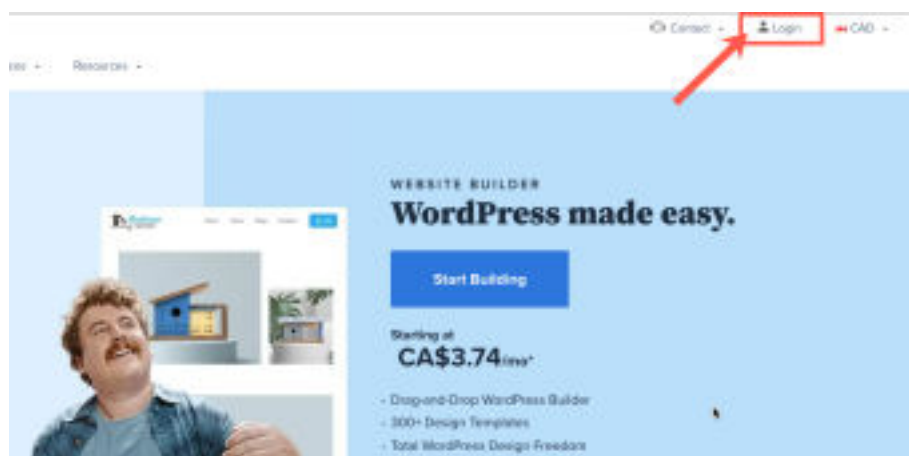

In this chapter, you will Launch your site which removes the “Coming Soon” message and makes it visible on the internet. You will also update your “Permalinks” which allows you the ability to give unique names (urls) to each page published.

Login to Wordpress Site

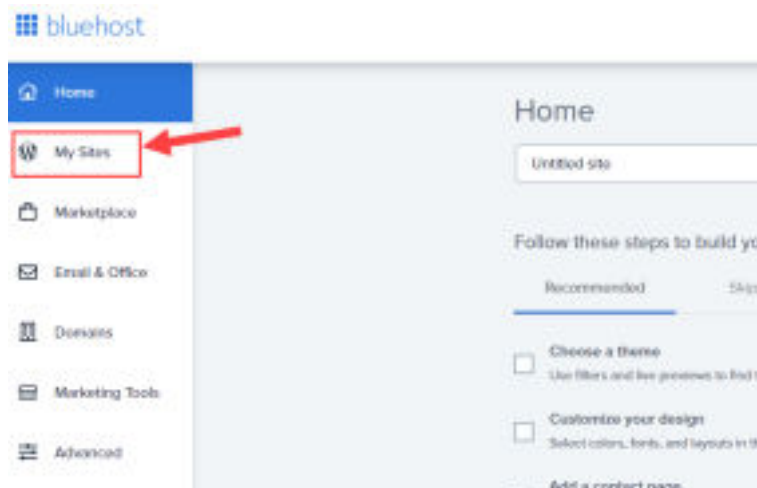

1. Wordpress Site

- a. Log into Bluehost:

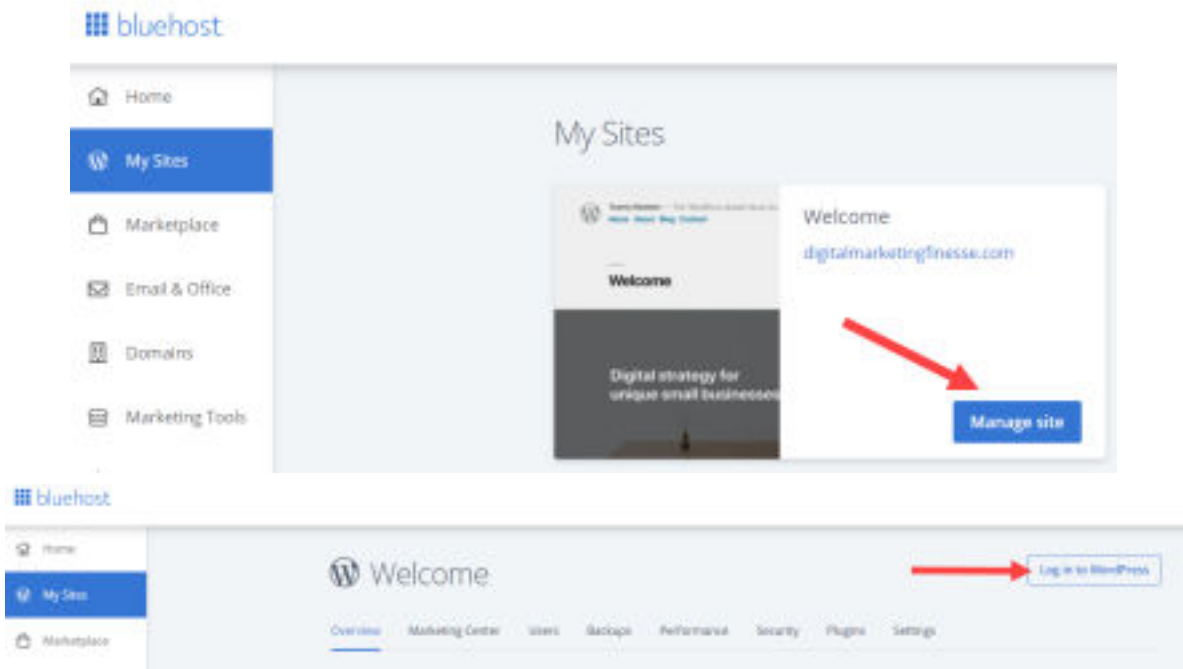

<https://my.bluehost.com/web-hosting/cplogin>

- b. Once logged in, from the menu on the left, **click on My Sites**

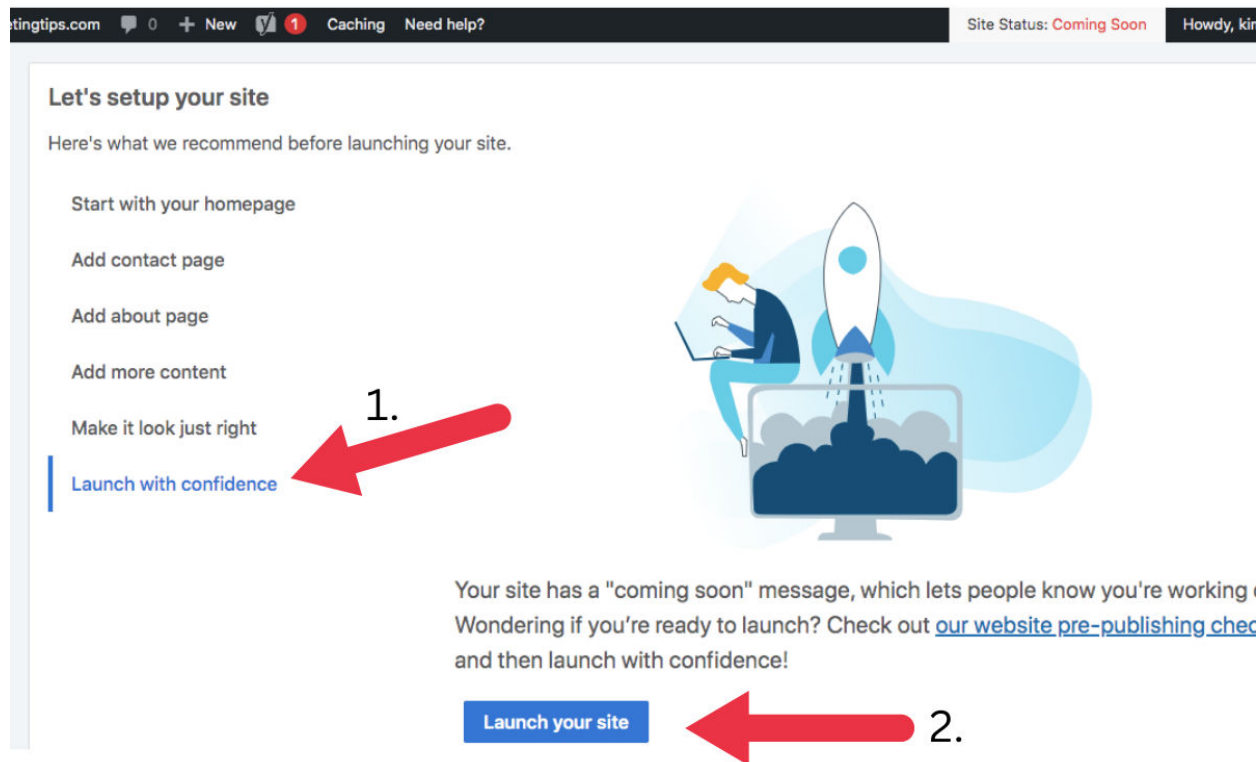

- c. Click on the **Manage Site** button and on the next page click on the **Log into Wordpress** button to open your WordPress site.

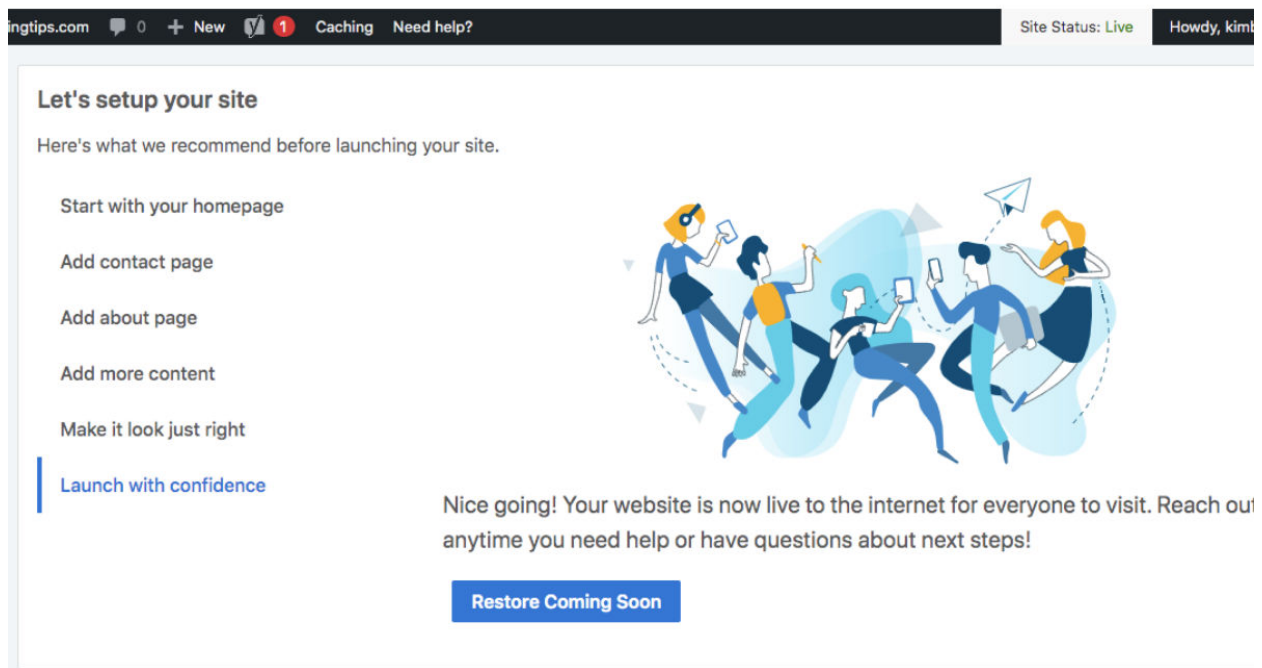

2. Launch your site in Wordpress

- a. Activate Site (if applicable)
 - i. When you first log into your Wordpress site, the first screen will prompt you to set up your site. In the middle of the screen you will see a list of options, click **Launch with confidence**.
 - ii. After you click Launch With Confidence, then click the blue button in the middle of the screen that says **Launch Your Site**.

- iii. Once you have clicked Launch Your Site, the text on that blue button will change to “Restore Coming Soon” (see image below). DO NOT click the button when it says Restore Coming Soon.
- iv. This means you now have a live site. Congratulations!

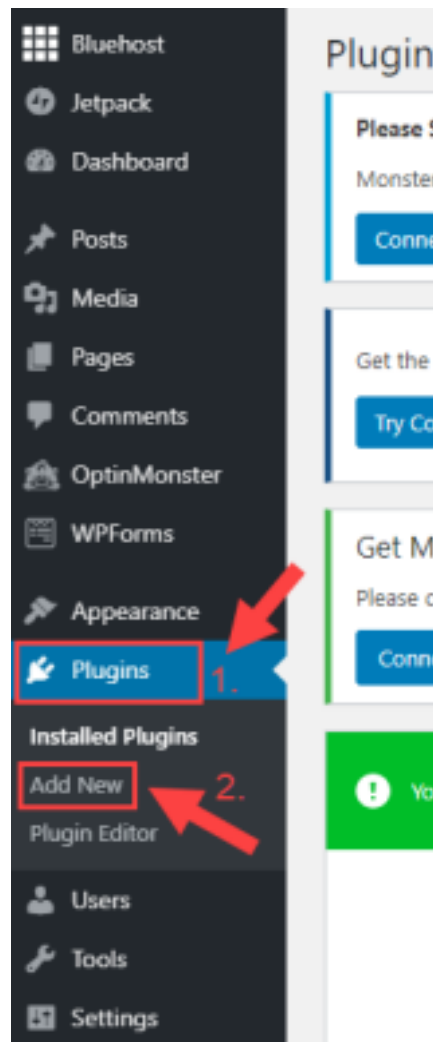

Chapter 3: Set Up Wordpress Plugin

(Log into Wordpress to complete the Plugin Installation)

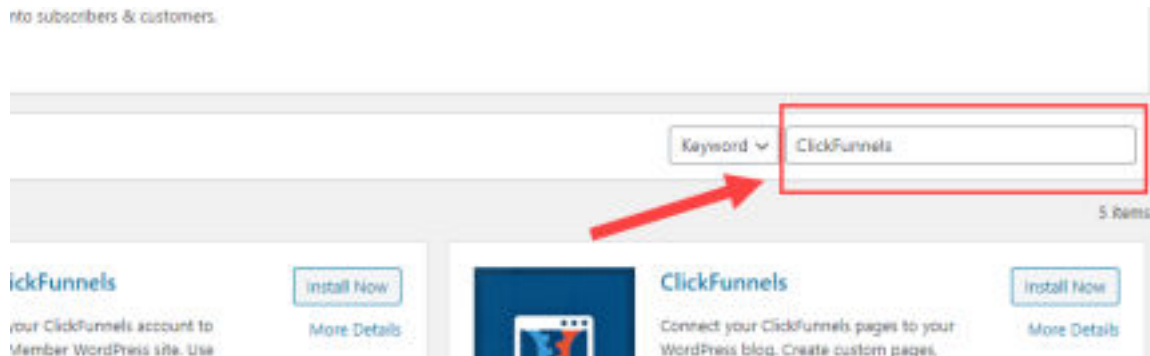

Install ClickFunnels Plugin

This plugin is used to publish pages you create in ClickFunnels directly on your Wordpress site and will be branded with your domain name.

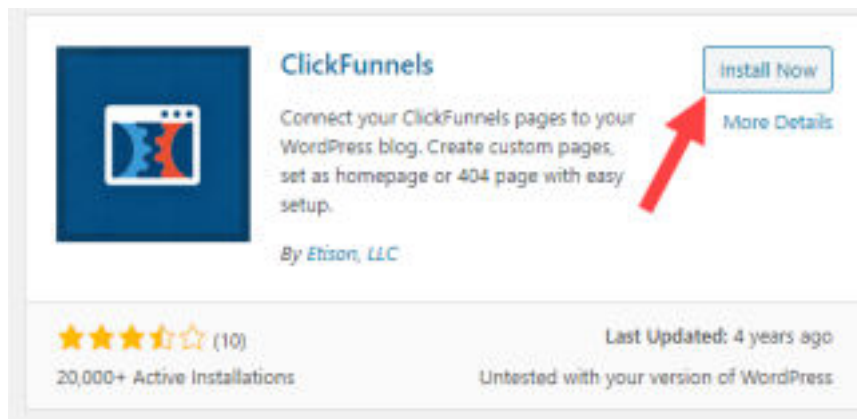

- a. From the left hand side menu, select Plugins, then select Add New

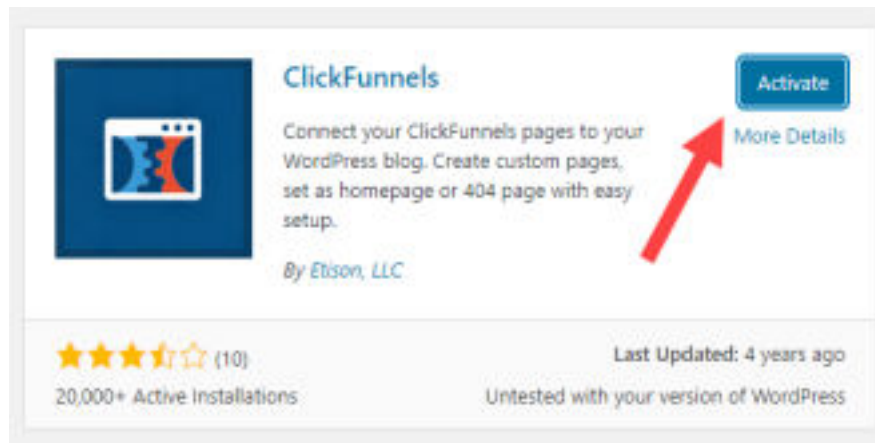

b. In the Search bar on the right hand side, type in Clickfunnels

c. Once you have located the ClickFunnels plugin (dark blue icon), click on the **Install Now** button.

d. Once the plugin has completed installing, click on **Activate**.

e. You will now see the ClickFunnels plugin in the menu
